- BHC

PROFILE

Experienced Software Development Team Lead with almost 5 years in the field. Skilled in managing teams, building software solutions, and delivering projects on time. Strong background in modern programming and cloud technologies. Passionate about mentoring, helping teams grow, and continuously learning new skills.

WORK EXPERIENCE

ALGAR Information Systems, Inc.   **2023 - Present**
Software Development Team Lead

- Problem Solving: Helping team members overcome technical obstacles and complex problems by providing solutions or leading them in the proper direction.
- Skill Development: Mentoring team members to improve their technical skills, allowing them to advance in their professions and encouraging continual learning.
- Task Prioritization: Collaborating with stakeholders, product managers, or project managers to rank tasks according to project objectives, timeframes, and business needs.
- Decision Making - Developed sound decision-making skills by evaluating multiple solutions, balancing technical trade-offs, and selecting the best approach to meet project requirements and deadlines.
- Critical Thinking: Honed critical thinking skills by analyzing complex cases, identifying root causes, and devising effective solutions to improve system performance and user experience.

ALGAR Information System Inc   **2021 - 2023**
Junior Software Developer

- Following coding standards and best practices to help create clean, efficient, and maintainable code.
- Identifying and resolving software bugs, performance issues, and other problems by analyzing code and debugging.
- Providing support in troubleshooting and resolving issues in existing systems or applications, using both automated and manual testing tools.
